### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 2 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

### **DETAILED ACTION**

This application is in condition for allowance except for the following formal matters:

#### **IN THE DRAWING:**

- The drawings are objected to as failing to comply with 37 CFR 1.84(p)(4) because *reference character "110" has been used to designate both "Offset" and "Programmable delay"*. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

#### **IN THE CLAIM:**

- In claim 14, page 12, line10, "according to claim 13" should be change to -- according to claim 11--, because there is insufficient basis for "said DQS strobe".

### ***Allowable Subject Matter***

Claims 1-21 are allowable over the prior art of record because none of the prior art whether taken singularly or in combination, especially when these limitations are considered within the specific combination claimed, to teach: an apparatus for providing an optimal

Art Unit: 2818

memory access strobe comprising means for adjusting initial delay by a fine tuning offset determined by a memory test, and among others as claimed in independent claim 10; a DQS strobe controller comprising an adder/substracter element, among others as claimed in independent claim 19, for implementing a fine tuning adjustment of initial delay, the fine tuning adjustment being determined empirically by operation of the DQS strobe controller in operation with the DDR memory device. Method for providing an optimal memory access strobe comprising step of adjusting the initial delay by a fine tuning offset determined by the memory test, and among other step as claimed in independent claim 1.

### ***Conclusion***

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- Chung (6,327,217) discloses variable latency buffer circuits, latency determination circuits and methods of operation thereof.
